

January 2026

DECLARATION

It is hereby declared that the copper tube **SMISOL® Gas**, manufactured by Serravalle Copper Tubes S.r.l. (SCT), is produced in accordance with the following standard:

- **EN 1057** – Copper and copper alloys – Seamless, round copper tubes for water and gas in sanitary and heating applications

SMISOL® Gas is made of phosphorus-deoxidized copper with a minimum copper content of 99.9% (CW024A – Cu-DHP).

The product is factory-coated with a continuous PVC sheath with full cross-section (without air channels), suitable for underground installation.

During manufacture, the tubes are subjected to a treatment for passivation and stabilization of the internal surfaces.

The coating complies with the following standard:

- **UNI 10823** – Copper tubes with coating for gas applications in buried installations

Due to these characteristics, **SMISOL® Gas** is suitable for the following applications:

- Distribution of liquid and gaseous fuels
- Underground installations, particularly for gas networks

The product is suitable for use in compliance with applicable regulations, including:

- **UNI 7129** – Gas systems for domestic and similar use supplied by distribution networks – Design and installation
- **UNI 7131** – LPG systems for domestic use not supplied by distribution networks – Design, installation, operation and maintenance

The product shall be installed in accordance with applicable regulations for buried applications.

The product shall be used in compliance with applicable national and local regulations.
