

January 2026

DECLARATION

It is hereby declared that the copper tube **SMISOL® Tekgas**, manufactured by Serravalle Copper Tubes S.r.l. (SCT), is produced in accordance with the following standard:

- **EN 1057** – Copper and copper alloys – Seamless, round copper tubes for water and gas in sanitary and heating applications

SMISOL® Tekgas is made of phosphorus-deoxidized copper with a minimum copper content of 99.9% (CW024A – Cu-DHP).

During manufacture, the tubes are subjected to a treatment for passivation and stabilization of the internal surfaces.

The product is factory-coated with **PE-LD sheath**, providing an air gap, suitable for passing through solid walls, hollow brick walls, and prefabricated panels, as prescribed by **UNI 7129**. It is also suitable for concealed installation as required by the same standard.

Due to these characteristics, **SMISOL® Tekgas** is suitable for the following applications:

- Distribution of liquid and gaseous fuels, particularly for systems installed inside walls

The product is suitable for use in compliance with applicable regulations, including:

- **UNI 7129** – Gas systems for domestic and similar use supplied by distribution networks – Design and installation
- **UNI 7131** – LPG systems for domestic use not supplied by distribution networks – Design, installation, operation and maintenance

The product shall be installed in accordance with applicable national and local regulations.
