

January 2026

DECLARATION

It is hereby declared that the composite copper-PE tube **Strato®**, manufactured by Serravalle Copper Tubes S.r.l. (SCT), is produced in accordance with the following standard:

- **UNI 11342** – Composite seamless copper-PE tubes for fluid distribution

Strato® is made of phosphorus-deoxidized copper with a minimum copper content of 99.9% (CW024A – Cu-DHP).

The product is factory pre-insulated with a closed-cell expanded polyethylene (PE-LD) foam sleeve, manufactured without the use of CFCs and HCFCs, in compliance with:

- **Regulation (EU) 2024/590** – on substances that deplete the ozone layer

During manufacture, the tubes are subjected to a treatment for passivation and stabilization of the internal surfaces.

Strato® is compatible with fittings and coupling systems compliant with:

- **EN 1254-8** – Copper and copper alloys fittings – Fittings for multilayer piping systems

Due to these characteristics, **Strato®** is suitable for the following applications:

- Distribution of potable water
- Heating systems
- Chilled water distribution

The product shall be used in compliance with applicable national and local regulations.
